In order to best prepare the next generation of our nation's scientists, the doctoral program in different fields at the University of Karachi is designed primarily to facilitate graduate students in developing critical thinking skills and provide guidance to problem-solving through hands-on experience in academic research and extending it towards commercialization. This seminar is designed to lay the foundation for student's future professional careers, either as research scientists in industry and/or as teachers and researchers in academia. One of the goals of this seminar is to ensure that our graduate students are provided with an understanding of basic research experience and acquire the skills needed to conduct more objective research.
