Read the passage to answer question 5-6

About 300 genera and 3,000 species of the Apiaceae family exist in the Northern Hemisphere. Nearly a quarter of these genera are native to the United States, with several large genera in the West. Members of this family are usually aromatic herbs with hollow stems, fern-like leaves, and small flowers in umbels that are further grouped into a compound cluster. The family is important for such foods as carrots, parsnips, and celery and such spices and seasonings as coriander, caraway, anise, parsley, and dill. However, some species are very poisonous.

5. Approximately how many genera of the Apiaceae family are native to the United States?
   
   A. 25  
   B. 75  
   C. 300  
   D. 3,000
